

## Versatile, keyless security

No need to keep track of keys!

The Combi-Bolt offers an innovative keyless security solution without the need to hassle with or losing keys. Great for sharing access with others and the combination can be easily reset at any time. The Combi-Bolt offers versatile, easy-to-install keyless security for a wide variety of applications.

Trailers, RV's and Vans

### Installation instructions

#### Flush Installation

1. Using the Combi-Bolt as a template mark the screw positions. Drill pilot holes for the screws.
2. Screw the Combi-Bolt into place, with the one-way security screws supplied.

#### Recessed Installation

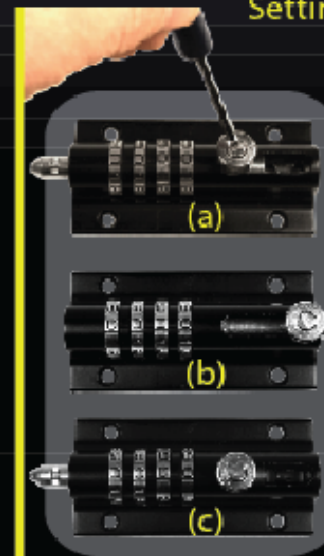

1. Position the latch plate with the aid of the bolt. Mark the position of the latch plate & recess into the frame. Drill pilot holes.
2. Install the bolt following flush fitting instructions.

### Setting the combination

Easily change combination (must be at current opening combination to change).

1. The bolt is factory set on 0000.
2. Loosen recoding screw (a)
3. Lift the handle & move bolt to right. Keeping held to right, tighten screw down to keep in recoding position (b). Set new code (make a note of number). Reverse above (loosen screw, return bolt, tighten screw). (c)
